Abstract

This manual gives operation instructions of the Support website, telling users how to browse the website and use it to complete work properly.

1 User Registration

1.1 User Registration

1.1.1 Common user registration

Before login, an account must be registered to obtain relevant permission. Common user registration including system user, outsourcing user, multi-vendor user, terminal user can be approved automatically.

STEP 1: Open the IE browser, type supporthk.zte.com.cn (or support.zte.com.cn), and press the Enter button to enter the homepage of the Support website.

SETP 2: Click the **Register** button in the top corner to enter the registration page.

Or, click **Login** to enter the login page and then click **Register Now** to enter the registration

page.

1.4 Configuring Service Request Admin User

The user with the permissions of Service Request Admin Group can manage and query the service request tickets submitted by other employees in the company included in the support group. The user without the right can only view the tickets submitted by himself / herself.

STEP1: Enter **Management** > **Rights Management** > **Role Management**, and create the role of Service Request Admin User. The right of this role can submit and query service request tickets. Currently, the role has already been configured in the system.

STEP2: Enter **Management > Rights Management > Support Group Management**, and create a service request management group named by the customer company, such as Globecomm Service Request Admin Group. Click **Add** to enter the support group management page, fill in the Support Group Name, and select the Role of Department Scope. Then, click Add to create the support group.

Notes:

- 1) **Role:** Select the Service Request Admin User that has already configured.
- 2) **Department Scope:** Select the department to be managed, that is, service request tickets in the department to be managed and queried.
- 3) **Product Scope:** Select the product scope to be managed.
- 4) **Region Scope:** Select the managed countries. Generally, it is used for transnational companies.

 Service Requ Support Requ Pending My A All My Reque Search Reque SLA Report Reports User Manual Suggestions License Spare Parts Spare Parts 	Action 2 ests ests	Request ID Status Request Time	All 2019-02-28 To	v 2019-03-29	Subject Customer Company Requester	Please select Search	Excel Export

3.2 Submenu Introduction

3.2.1 [Service] > [Service Request]

3.2.1.1 [Search Service Request]

A user can set search conditions to search a service request ticket. Search conditions include "Request ID", "Subject", "Status (Closed, Working in Progress, etc)", "Company", "Request Time", "Requester", etc.

For example, search all the closed service requests of which the request time is from

2014-03-01 o 2014-04-01.

1) Search Operation:

STEP 1: Set search conditions, select **"Close requests"** in the "Filter" field, and select "2012-09-11" to "2014-09-11" in the "Request Time" field.

STEP 2: Click Search and the search results will pop up automatically.

ZTE	Home	Service	Documentation	TT Case	Вι	ulletin	Forum	My Space

2)Suggestions:

A user can check the processing status of submitted tickets, give feedback of his/her own suggestions, and communicate with support engineers, as shown below.

STEP 1: Search the ticket of which the status is "Working in Progress". The search method is as shown above. For example,

ZTE Home	Service [Documentation	TT Case	Вι	ulletin	Forum		My Spa

3) Closing a ticket

A user can close a service request and the operation steps are as follows.

STEP 1: Search a service request ticket in the status of "Closure validating" . For example,

ZTE	Home	Service	Documentation	TT Case	В	ulletin	Forum	i.	My Space
Service > Servic	e Request > Se	arch Requests							
 Service Required Support Required Pending My All My Required Search Required SLA Report 	uest Action ests	Request ID Status Request Time	Closure Validating	то 2010-27		Subject Customer Company Requester	Please	e select	• Excel Export

3.2.1.2 [Create Service Request]

A user can submit service request tickets such as incident, problem and consultation. After submission, ZTE support engineers will respond and process in time. When a ticket is submitted by ZTE employees, the system will go to the CSC system automatically. Please create a ticket in the system and note that all the fields marked with "* "are mandatory.

Pending My Action	Requester Informatio	n

Service request ticket ID: It is the unique sign of the ticket, and the ticket can be searched by it.

Requester information: This item is the information submitted by the service requester, including the requester name, email, phone number, company, etc.

Request information: Fill in the data of service request ticket.

- 1. Service agreement: Select the correct SLA package according to the contract.
- Request Type & Priority: Select the correct request type and priority according to the request type such as incident, consultation and product problem as well as the urgency.
- 3. Product: Select the product category.
- 4. Subject: Describe the problem in brief.
- Request description: Describe the problem background, phenomena and cause to facilitate the support engineer to analyze the problem and provide solution.

[Service Request] > [Report] : System administrator can use this function to take statistics and export the corresponding report.

[Service Request] > [User Manual] : A user can download a user manual and understand the operation instructions of service requests.

3.2.2 [Service] > [Suggestions]

3.2.2.1 [Submit Suggestion]

A user can give his/her comments on the system and improvement suggestions. All the fields marked "*" are mandatory.

3.2.2.2 [Submit Complaint]

When using the website, a user can complain on any unsatisfactory issue and the complaint will be accepted by the website administrators.

3.2.3 [Service] > [License]

[To be processed by me]: A user can check the license request ticket that he/she needs to process. Usually, this function is only used by administrators.

[License application] : A user can submit a license application request, before which a license application form must be filled in and loaded. The form can be downloaded on this page.

[License Query] : A user can set conditions to search the detailed information of the license application form.

4 TT Case

4.1 Login Operation

STEP 1: Login ZTE technical support website. Refer to Section 2.2 for the login method.

STEP 2: Click **TT Case** in the title bar to enter the knowledge base page, as shown below.

4.2 Submenu Introduction

This section mainly introduces how to search, submit or download knowledge and gives description on the content and operation instructions of "Related to me".

[TT Case] > [Search]

4.2.1.1 [Search]

On the homepage of TT Case, knowledge can be searched by full text. Type keywords (separate them by space if there are multiple ones) to search. A user can also set search conditions to make full-text advanced search. For example, search the content including "ZXC10" and "BTS".

STEP 1: Type **ZXC10 BTS** and click **Search**.

ZTE	Home	Service	Documentation	TT Case	Bulletin	Forum	My Space

4.2.3 [TT Case] > [Related to Me]

[Related to Me] : It includes all the issues to be processed by the user such as knowledge review, modification and recommendation. At the same time, a user can set search conditions to search relevant knowledge. This section introduces how to review, modify and recommend knowledge.

4.2.3.1 Knowledge Review

STEP 1: Select one in the "Service State" field and click **Search**, all of knowledge under the state will be displayed in the result list.

Filler			All				
Plea	ise fill i	n the search con	dition				
Knowl	ledge I[D			Product Search		
Produ	ct line		Please select	•	Product Category	×	
Produ	ct Sub-	category	Please select		Product Model	Please select •	
Title					Status	Please select *	1
Subm	itted by				Created Time	Please select Rejected to issue Rejected to review	
						In a systed to submit	Excel Export

	-						0500800

STEP 2: In the list, select the knowledge and click its **title**, all the content of the knowledge can be displayed.

STEP 3: Review the knowledge content. Set the "Knowledge Audience" and give review comments. If knowledge is approved, it will be issued; otherwise it will be returned to the knowledge submitter and the submitter should process according to the review comments.

STEP 4: After finishing knowledge review, the reviewer can select the operation among "Browse", "Save" and "Submit".

4.2.3.2 Knowledge Modification

STEP 1: Select "Rejected to submit" in the "Service State" field and click **Search**, the knowledge that failed to be approved will be listed automatically.

STEP 2: Open the knowledge in the state of "Rejected to submit" to enter the knowledge filling page. A user can modify the knowledge content according to the review comments and then click **Submit**. For example, modify the knowledge "BSSB software (CDMA2000)-test ".

4.2.3.3 Knowledge Recommendation

A user can recommend knowledge to others, but the knowledge to be recommended must be in the state of "Issued". For example, to recommend the knowledge "ZXCTN 9000 series – L2VPN service fails due to board incident", the operation steps are as follows:

STEP 1: Enter the "Related to Me" page to search the issued knowledge.

STEP 2: Select the knowledge by ticking the " \square " before the knowledge title (please DO NOT click the knowledge **title**) and then click **Recommend**.

STEP 3: On the new recommendation page, type the email address of the recommended person, the subject and description and then click **Submit** to finish the knowledge recommendation.

Tips:

The email address of the recommended person must be the email of ZTE employee (external email is not supported currently). Please separate multiple email addresses by comma "," .

All the fields marked with "* "are mandatory.

5 Documentation

5.1 Login Operation

- STEP 1 : Login the Support website. Refer to Section 2.2 for details.
- STEP 2 : Click **Documentation** to enter the documentation page.

Internal Use Only

Tips:

① : You can enter the keywords of the document in the search bar.

② : Select the product and then click the **Document Map link**. (In the above example, we click **Core Network product**).

③ : In the Document Map, you can see documents in Hot Topics and Bookshelf.

5.2.1 Search Product via Document Map

When you search a User Manual Library, you may search product via Document Map.

STEP 1 : Click **Bookshelf**.

STEP 2 : Select the product version.

Core Network Mu	ultimedia
Hot Topics Bookshelf	
rot ropics booksnen 1 [™] CS	
WCDMA&TD-SCDMA >ZXUN ICX(MSCS) V5.15.10 V4.16.10 >ZXUN IMG(MGW_W) V5.15.10 V4.16.10 2	CDMA2000 >ZXC10 MSCe V4.12.10 >ZXC10 MGW V3.10.22

5.2.1.1 Download

STEP 1 : In the download page, click **Download** to download the user manual library to the local computer.

STEP 2 : If you haven't installed ZTE eReader software yet, click **Download** the latest ZTE eReader.

ZTE eReader : This ZTE electronic documentation reader helps you download and read electronic User ZTE Manual Library in a computer. It also provides powerful documentation management functions.

User Manual Library: Suffixed by .zed, it contatins ZTE's electronic documents in various formats to meet user requirements. It can be read by using ZTE eReader only.

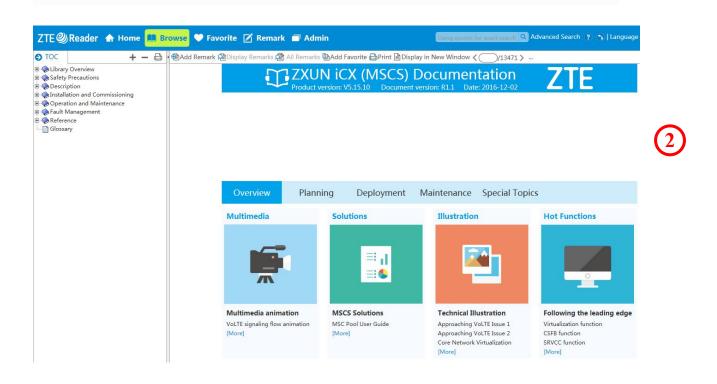

5.2.1.2 Read

To read the user manual library, perform the following procedure:

STEP 1 : In your computer, double-click the user manual library you downloaded.

STEP 2 : Then you can read this user manual library via ZTE eReader.

zw Lib20160316094407-ZXUN iCX (MSCS) (V5.15.10) User Manual Library_R1.1_734692.zed

5.2.2 Search Product Directly

Click the menu such as [Product documentation], related content will appear. Search conditions can be set. The search result will be shown based on the search conditions.

Enter the document title or document number. For example, type "SGSN" in "Document Title", search results will display all the documents of which the title includes "SGSN".

5.2.3 Document Operation

Transmission

Search results are displayed as a document list, including "No.", "Title", "Document No.", "Document Type", "Views", "Issue Date" and "Operation". Each item is introduced as follows:

Title: Refer to document name, showing the main content of the document.

Document No.: It is given by the system and is in one-to-one correspondence with the document.

Document Type: It mainly includes " 🛄 ",multimedia and PDF files. You need to download ZTE eReader to open a ZED file which is a User Manual Library.

Views: Refer to how many times this document has been read.

Issue Date: Refer to the time when the document is issued.

Operation: A user can perform the "Browse", "Download" and "Favorite" operations on a document. The document added to "Favorite" can be found in [My Space] > [My

ZTE

Favorite] > [Documentation].

5.2.3.1 Browse

Select the target document and click **Browse**, a user can read it online. STEP 1 : Select the document and click **Browse**, a new page appears.

Notes

(1): System equipment list: Click any product menu to enter the page of this product. A user can publish postings related to this product on this page.

(2): Full-text search: A user can type keywords and the system will perform full-text search on this forum.

③: Latest topics: Display the postings published recently.

④: Classic postings: Display the classic postings on this forum.

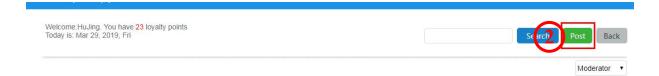

6.2 Post

Take CDMA Wireless product as an example to introduce how to post on the forum.

STEP 1: In the system equipment list, click **CDMA** to enter CDMA wireless product area.

System Equipment Forum Core Network Product	Latest Topics		mor
Transmission products	Subject	Author	Date
Access products	test1111t	00033925	2017-10-12

ZTE Technical Support Website Maintenance Notice - 20111122

Dear ZTE Customers:

ZTE will be performing system upgrade maintenance from 17:00 Nov22, 2011 to 21:00 Nov22, 2011(GMT+8:00, Beijing Time). The upgrade is mainly on TT case and Service modules.

```
The Support website will not be available during the period. Customers will however be able to contact us via the following ways:
E-mail/support@tte.com.cn(Overseas),800@tte.com.cn(China)
Hoffme: +86-755-26771900 (1x24,Overseas),0755-26770800 (1x24, China)
```

We apologize for any inconvenience. Welcome to visit ZTE Support website after the maintenance.

ZTE GCSC Nov22, 2011

[Technical Notification]

A user can set the search conditions to search product technical notifications related to being out of the market, upgrade, patch fix, etc.

STEP 1: Set search conditions and click **Search**. For example, search the technical notification of "Core Network/Core Network (CN)".
